Com S 471
Homework 1

Due 12:30 pm (i.e. just before class) 9/7/17

UPDATE: Ignore Part c for both problems.

Note: you can specify each test set using names or placeholders for the equivalence classes or blocks, but you must also give a table showing what actual values the tester should substitute for the placeholder name when implementing the test.

Problem 1

a) For the application described in Exercise 2.9, define a uni-dimensional input partitioning.
b) Give an All Combinations test set for the partitioning.
c) Give a Pair-wise test set for the partitioning.

Problem 2

a) For the application described in Exercise 2.11, define a uni-dimensional input partitioning.
b) Give an All Combinations test set for the partitioning.
c) Give a Pair-wise test set for the partitioning.

Submission Policy

Submit via Blackboard. Include your name in the submitted document.

We prefer typewritten submissions. However you may submit clean scans. Difficulty in reading the scan will be reflected in your grade.

In your submission, acknowledge any assistance you received and any resources (other than the textbook) that you used in the preparation of this assignment.
